

AGM Statement

May 4, 2007

RNS Number:0905W
Computacenter PLC
04 May 2007

At Computacenter's AGM to be held at 11.00am today, the following will be announced:

The performance of Computacenter in the first quarter of 2007 has been mixed.

We have made good progress in France. Although Computacenter France is not yet back in profit, the run rate losses are much reduced and we expect this improvement to continue throughout the year.

Computacenter Germany has performed well, with trading ahead of the previous year. The underlying business results have exceeded our expectations despite being held back slightly by losses arising from the two shared datacentre services contracts, although these are much reduced on the second half of 2006.

In the UK, our services business has won important new contracts including the five-year outsourcing agreement with BT. However, product sales have failed to meet expectations and the overall UK financial performance in the first quarter has been below that achieved in the first quarter of 2006.

Overall, we continue to anticipate that the full-year performance of the Group will be in line with management's expectations but this remains, as always, dependent upon the overall state of the IT market.
